

OPEN POSITION: Electrical Estimator

JOB DESCRIPTION

- Analyzing Plan Documents to determine conduit and wire lengths as well as suitable means and methods based on the NEC/NFPA electrical codes.
- Determining the amount, type, and cost of Materials, Switchgear, Panels, ATSS, Generators, and Fixtures needed for each electrical project.
- Determining the amount of labor required to complete each project.
- Determining the potential profitability of electrical projects to assist management in making sound bidding decisions.
- Providing viable solutions to increase project profitability.
- Completing and submitting competitive project bids in accordance with established guidelines.
- Regularly updating cost databases to accurately reflect fluctuating material and labor costs.
- Experience in Residential, Commercial, and Industrial projects.

Responsibilities

- Completion of a postsecondary education electrician training program.
- A bachelor's degree in construction science, engineering, construction management, or a related field is advantageous. These requirements may be substituted with 5-10 years of field installation experience. Design/Build capabilities a plus.
- Valid electrician's license or equivalent experience.
- The ability to interpret blueprints.
- Strong analytical and problem-solving skills.
- Excellent organizational skills.
- Effective communication skills.
- Exceptional customer service skills.
- Detail-oriented.
- Plan Doc Take-Off procedures and computer program competency.
